

Alisia Stasi

Senior Front end/full-stack developer

alisia@coderocker.co.uk

http://coderocker.co.uk

@code_rocker

Contagiously enthusiastic web developer and technical lead.

Self-motivated, independent and proactive.

Creative thinker, smart+hard worker, quick learner, problem solver, experimenter, team player.

In love with pushing projects forward, with helping people understand the big picture, and with crafting innovative and cutting-edge solutions.

I perform at my best in fast paced, multi-disciplinary teams and on challenging projects.

Soft skills

Being part of one - or several - teams and helping project managers and product owners find the optimal technical solutions is one of my greatest passions. Spending half of my life in the many layers of web development, beginning when the layers were definitely fewer and thinner, I am able to see the many facets, and take into account priorities, deadlines and effort with a full Agile frame of mind. I also take pride in my skills in setting standards, steering the development in the right direction, mentoring junior developers, and in taking responsibilities into my own hands.

Random facts

I speak English and Italian fluently (I'm Roman).
I drive, although I do not currently own a car.
I make a mean lasagna.
I'm quite a joker... laughter is good!
In my off time, I like to mingle with start-ups (proud co-founder of two exciting projects!).
I'm an ENTP in the Myers-Briggs classification.

Work experience
